PROFESSIONAL SUMMARY

AI-focused IT professional with 10+ years of experience in mission-critical healthcare systems, now specializing in machine learning, fraud detection, and cloud-based AI deployment. Proven ability to build and deploy real-world AI systems, including predictive models and intelligent monitoring solutions. Strong interest in AI adoption, data-driven systems, and scalable cloud infrastructure.

CORE COMPETENCIES

- Stakeholder Collaboration & AI Adoption
 - Machine Learning (Scikit-learn, TensorFlow, XGBoost)
 - Data Analysis (Pandas, NumPy, Matplotlib)
 - Cloud Computing (AWS: S3, Lambda, API Gateway, DynamoDB)
 - Fraud Detection Systems
 - Data Drift & Monitoring Systems
 - Model Deployment & APIs
 - Python, JavaScript, HTML/CSS
 - Git & GitHub
 - AI Tools (ChatGPT, Gemini, Claude)
-

PROFESSIONAL EXPERIENCE

Chief Technical Officer (ICT)

Delta State University Teaching Hospital

2010 – Present

- Managed enterprise IT systems in a high-availability healthcare environment
 - Monitored and maintained mission-critical systems with zero tolerance for downtime
 - Led infrastructure upgrades, system deployment, and performance optimization
 - Implemented monitoring and fault detection strategies for operational efficiency
 - Coordinated IT support across multiple departments
-

PROJECTS

Fraud Detection System

- Built end-to-end ML pipeline with SMOTE, Random Forest, XGBoost
- Developed real-time fraud prediction system

GitHub: <https://github.com/iMonie/fraud-detection-ml>

Data Drift Detection System

- Implemented drift detection using KS test and sliding window analysis

GitHub: <https://github.com/iMonie/shift-detection-study>

MNIST Deep Learning Model

- Developed CNN for digit recognition

GitHub: <https://github.com/iMonie/mnistproject>

AWS Cloud Portfolio

- Built serverless application using AWS services

GitHub: <https://github.com/iMonie/aws-cloud-portfolio>

EDUCATION

M.Sc. Information Technology

National Open University of Nigeria – 2026

B.Sc. Information Technology
